What Calculator Should I Buy?

IF you are planning to BUY a calculator, here is what we suggest. This is by no means what you have to purchase.

ONLINE PRICES AS OF Thursday, August 18, 2016

**You might also check EBAY or Craigslist.

DO NOT BUY: TI-nspire CX CAS or Casio Products

In order to do your homework, you will need a graphing calculator. If you currently have a TI-83 or TI-84, you can still use it. You may have to come in for extra help before or after school to get help using your calculator. We will teach how to use the TI-nspire CX in class since we have classroom sets of this model for use at school.
