

Teamwork

Get Started

Get paper and a pencil.

Put **1** **2** **3** **4** in a bag.

Repeat for Each Round

Choose **a**, **b**, or **c**. Ask someone to read the problem aloud.

Pick a tile. Pick two tiles if your group has only two students.

Follow the directions next to your number when it is your turn.

Do These Steps in Order

- 1** Ask questions about the problem so that your group can determine which operations you would use to solve the problem.
- 2** Ask a question so that your group can determine which operation to use first.
- 3** Ask a question so that your group can determine which operation to use second.
- 4** Ask a question so that your group can solve the problem. Work together to solve it. Decide if you could have changed the order in which you used the operations.

- Serena practices her violin for three hours every day and takes singing lessons twice a week for two hours each time. How many hours does Serena spend on her music each week?
- Martina sells small, medium, and large snack bars. She sells the bars for 25 cents, 50 cents and \$1.00. She sells 12 large bars and 15 small bars. How much does she collect altogether?
- Eric wants to buy some baseball cards that cost 35 cents each. He has 5 quarters, 7 dimes, 8 nickels, and 15 pennies. How many cards can he buy?

If you have more time

Make up another problem that can be solved by using more than one operation. Ask a partner to solve your problem.
