

Fourth Grade Topic 14 Performance Task

Name: _____

Sarah is helping her parents clean up at home. First, she helps her father in his workshop.

1. Sarah helps to organize the care car items. Would a container of windshield washer fluid be measured in cups or gallons? Would a container of car wax be measured in milliliters or liters?
2. Sarah's father says his care can go as fast as 2,682 meters per minute. How many kilometers can the care go in 1 minute? How many centimeters can the care go in 1 minute?
3. After a break, Sarah helps her mother clean up the kitchen. She empties bags of flour into canisters. Which is a reasonable weight for a bag of flour, 5 pounds, or f tons?
