

Fourth Grade Topic 9 Performance Task

Name: _____

You and five friends picked the apples shown in the table below. There are red, green, and yellow apples.

Kinds of Apples	Total Number	Number per Person	Number Left Over
Red apples	52		
Yellow apples	26		
Green apples	30		

1. You and your friends decide to share each type of apple equally. Complete the table to show how many of each type of apple each person will get. Don't forget to include yourself.
2. How many apples will each person receive in all? Which color of apple has the greatest number left over? Did any color of apples have none left over?

3. How many apples in all are left over? Can these be shared equally with your group? Explain.

4. Suppose you make apple pies with your apples. It takes 6 apples for a green apple pie. It takes 9 apples for a deep dish apple pie made with red or yellow apples. How many pies can you make? What kind of pies will they

5. If you and seven friends divided the red apples equally, how many apples will each person receive? How many red apples will be left over?
