

Writing a Paragraph of Opinion

In order to protect and preserve wildlife, more land should be set aside in all parts of the world. First of all, many species have become endangered or threatened because of the loss of habitat or overhunting. Protecting wilderness lands from development would help to stop the loss of habitat for wildlife. Also, in those areas where wildlife habitat has already been lost to farms and towns, some of the land could be restored as wildlife habitat. Finally, the hunting of wildlife should be carefully controlled, since it not only deprives animals of the possibility of living out their lives but can also deplete animal populations. After all, in most places, the animals were there long before the humans were. For these reasons, it is my strong opinion that more wilderness preserves are needed.
